

Raven Housing Trust invest in QL Housing Management Software Solution from Aareon UK

Formed in 2002, Raven Housing Trust is based Redhill, Surrey, with managed stock of just over 6,000 units. The majority of Raven's properties are in Banstead and Reigate.

Raven has developed a reputation as a forward thinking organisation which has won national awards for its innovative environmental work.

Raven had been using their old housing management solution since 2003/04.

Raven began a complete system review in January 2011. Raven wanted a fully integrated, flexible and modern solution to cover all housing management needs and to include a Contact Management Solution together with an Electronic Document and Records Management System.

Anthony Green Raven's head of IT said "**After a thorough evaluation of the current UK market, reference visits and product demonstrations, Raven chose QL Housing from Aareon UK as its preferred solution. We hope that the flexibility of QL will allow us to provide even better services for Raven's customers.**"

Raven is now one of almost 100 customers who have chosen QL Housing from Aareon UK.
